Uses	*Greens*	*Tees, greens, and fairways*	*Tees, greens, fairways, and divot repair*	*Tees, greens, and fairways*	*Tees and fairways*
	Pure Distinction has a distinctive, bright green color. Its dense and upright growth habit makes for true and smooth putting. Pure Distinction recovers quickly from damage and also has excellent resistance to bacterial wilt, brown patch, anthracnose, *Fusarium* patch, leaf spot, and dollar spot.	Pure Select has an erect, super-dense growth habit for excellent turf quality and outstanding putting conditions. It's highly resistant to brown patch and *Microdochium*, and has exceptional dollar spot resistance. Pure Select also greens up quickly in the spring and maintains excellent density throughout spring, summer, and fall. It tops the charts for wear tolerance, making it a great choice for fairways and tees.	PC2.0 is a bentgrass variety that pays homage to the past with a look into the future. PC2.0 exhibits a stunning, medium green color with a very fine leaf texture. It displays a dense, upright, and agressive growth habit and competes exceptionally well against Poa annua. It is suitable for greens, tees, fairways, and divot repair.	Crystal BlueLinks distinguishes itself from other bents with its remarkable turf quality and unique blue-green color. Crystal BlueLinks also resists brown patch and dollar spot. It tolerates hot and cold temperatures and grows extraordinarily well in shady and low-light areas, making it ideal for greens, fairways, and tees.	PureFormance combines the best traits from PC2.0, Pure Select, and Crystal BlueLinks, which offer a broad genetic diversity and the highest disease resistance. It germinates and establishes quickly, stands up to traffic, and recovers quickly from damage. PureFormance also has excellent heat and cold tolerance, and greens up early in spring for great year-round color.
Seeds/lb. (est.)	7,032,058	6,787,428	6,729,970	6,841,786	6,886,813

Recommended seeding rate is 1.0 to 1.5 lbs./1,000 sq. ft. for new establishment

Tees, greens, and fairways	*Tees, greens, and fairways*	*Tees, greens, and fairways*	*Tees and fairways*	*Tees, greens, and fairways*
Because performance matters, we've blended our two highest performing bentgrasses to bring you Prestige premium bentgrass blend. This proven blend of Pure Distinction and Pure Select provides tour-quality surfaces every day, even in the harshest climates. Its benefits include high disease, weather, shade and salt tolerance as well as super deep rooting with fast recovery. Prestige is ideal for greens, collars, and approaches.	Elite is an outstanding blend of two high-performing bentgrasses that shine under the harshest climates. Exhibiting high disease tolerance, as well as tolerance to sun, shade, and salt, this new blend develops deep rooting with fast establishment and quick recovery. Elite is ideal for greens, collars, and approaches.	PennLinks II has a semi-erect growth habit and good density. It displays a beautiful, dark green color, and has good heat and drought tolerance and dollar spot resistance. PennLinks II provides an excellent playing surface for greens, tees, and fairways.	PennTrio certified creeping bentgrass is a genetically diverse blend of Penncross, Pure Select, and PennLinks II. PennTrio has all the strengths of a blend with ready-to-seed convenience and is a great choice for tees, fairways, and winter overseeding.	Pure Eclipse has the finest leaf texture and exhibits a dark green color. It has high density, particularly in the summer, and offers an aggressive grow-in. Pure Eclipse displays great wear tolerance with excellent disease resistance to brown patch, anthracnose, dollar spot, and pink snow mold. It presents a premium putting surface and is an excellent choice for tees and fairways.
7,032,058	6,814,607	7,031,226	6,300,000	6,406,780

Recommended seeding rate is .25 lbs. to 2 lbs./1,000 sq. ft. for interseeding

TEE 2 GREEN

BENTGRASS. IT'S ALL WE DO.

INTERSEEDING GUIDE

1. Choose your Tee-2-Green bentgrass variety.
2. Two or three times a year, add seed while aerating, slicing, spiking, or verticutting greens.
3. Water the new seed for two weeks.
4. Watch your bentgrass establish quickly.
5. Repeat annually until conversion is complete.

Regrass your course without missing a day of play

If you'd like to regrass but can't shut down the course for two months, consider adding a new, more vigorous bentgrass variety through an interseeding program. It takes almost no extra time, you can do it while you're aerifying, and your golfers won't miss a single day on the course.

Tee-2-Green has several bentgrass varieties that are excellent candidates for regrassing your course through an interseeding program. Their aggressive growth habits compete well and will crowd out *Poa* and many other less vigorous varieties. Plus, modern bentgrass varieties require fewer inputs and perform better at shorter heights, saving you money and improving playability.

You're only as strong as your weakest turf.
